

**IN THE ABSTRACT:**

Please insert the following text into the ABSTRACT OF THE DISCLOSURE on page 7 of the originally filed application.

-- A system and method are disclosed for the licensing and managing media resources in a converged services platform. A novel central pool of resource points representing a licensed level of media resource capability is created, the central pool for the storage of all default and any additional licensed resource points represented by the converged services platform, where portions of the central pool are dynamically allocated to one or more media resource cards. --
